## Limitador de tipos documentales (Type of Article)

The screenshot shows the PubMed search interface. At the top left is the PubMed.gov logo with the text "U.S. National Library of Medicine National Institutes of Health". To the right is a search bar containing the text "angioplasty". Above the search bar are links for "Details" and "Help". Below the search bar are three buttons: "Search", "Preview", and "Clear".

Below the search bar is a panel titled "Type of Article" with a "CLEAR" button in the top right corner. The panel contains a list of article types, each with an unchecked checkbox:

- Clinical Trial
- Editorial
- Letter
- Meta-Analysis
- Practice Guideline
- Randomized Controlled Trial
- Review

Below this list is a section titled "More Publication Types" with two more unchecked checkboxes:

- Addresses
- Bibliography

A vertical scrollbar is visible on the right side of the list.

- Permite centrar las búsquedas en uno o varios tipos de documentos: Ensayos Clínicos, Revisiones, Guías de Práctica Clínica, Meta análisis, etc.

## Opción recomendada

Porque permite realizar búsquedas por campos o combinar la estrategia de búsqueda con diferentes opciones: autores, revistas, clases de documentos, etc.

- Por autor/es:

Poner el apellido y la inicial sin puntos en la caja de búsqueda.

Permite buscar todos los autores en conjunto, o lo de cada uno, cambiando los campos o utilizando la opción “añadir más campos de búsqueda”

- Por revista/s:

Poner el nombre de la revista en la caja de búsqueda, el sistema presentará una lista de revistas indexadas.

Permite buscar en varias revistas a la vez cambiando los campos o utilizando la opción “añadir mas campos” de búsqueda

## [RACAND syndrome associated with primary biliary cirrhosis.]

[Article in French]

[Abouzahir A](#), [Badaoui M](#), [Ameziane T](#), [Fathi J](#), [Chahdi H](#), [Albouzidi A](#), [Mahassin F](#), [Ghafir D](#), [Ohayon V](#).

Service de médecine interne B, hôpital militaire d'instruction Med-V 10000, Rabat, Maroc.

### Abstract

The acronym RACAND means the association of Raynaud's phenomenon, antinuclear antibodies and digital necrosis without digital sclerosis. It is a rare syndrome recently individualised. The association with primary biliary cirrhosis has never been previously reported, and leads to discuss its nosology. A 57-year-old woman with a history of Raynaud's phenomenon, presented with recurrent episodes of fingers and toes necrosis. Clinical examination did not evidence digital sclerosis. Antinuclear antibody titer was high. There was no oesophageal or lung involvement. A liver biopsy performed because of moderate increase in liver enzymes showed histological lesions of primary biliary cirrhosis. Treatment with iloprost, platelet aggregation inhibitors and anticalcic drugs could not avoid amputation of several toes. It is possible that antinuclear antibodies are directly toxic to vascular endothelial cells and result in a diffuse or localized vasculopathy. The association with primary biliary cirrhosis is in favour of autoimmune condition of both vascular and ductular endothelial cells.
